Do not use conflict minerals Statement

According EICC (Electronic Industry Code of Conduct behavior, EICC) pointed out that the mining and sale of "conflict minerals" has become the main income of armed rebel groups in Democratic Republic of the Congo. They use this income to buy arms, making bloody conflict, resulting in serious human rights violations and cause environmental problems.

Prolight Opto will take responsibility to protect human rights and the environment. The policy of non-use conflict minerals is as follows:

1. Prolight Opto products do not use conflict minerals.
2. Request suppliers and their upstream suppliers do not use conflict minerals
